

SteriMatrix™ Acellular Dermal Allografts

- Dermal Allograft - the standard for regenerative medicine
- Biocompatible, remodelable, acellular dermal matrix
- Minimizes inflammation, encourages vascularization and cell repopulation
- Sterile - gamma irradiated to SAL 10-6
- Epidermal layer has been removed - eliminating the need to provide side specific placement
- Remodels naturally without the need for chemical crosslinking - avoids concerns of residual chemicals - preserves remodelability
- Thickness: 1.0 mm \pm 0.2 mm
- Width / Length: +2.0 mm / -0.5 mm
- Provided in a variety of convenient sizes (see below 111)
- Shelf storage at ambient temperatures
- Ready to use - no rehydration required

| Prod# | Description | Size |
|-------|-------------------------------|-----------|
| 77712 | SteriMatrix™ Dermal Allograft | 1 x 2 cm |
| 77724 | SteriMatrix™ Dermal Allograft | 2 x 4 cm |
| 77744 | SteriMatrix™ Dermal Allograft | 4 x 4 cm |
| 77748 | SteriMatrix™ Dermal Allograft | 4 x 8 cm |
| 77112 | SteriMatrix™ Dermal Allograft | 1 x 12 cm |
| 77755 | SteriMatrix™ Dermal Allograft | 5 x 5 cm |
| 77510 | SteriMatrix™ Dermal Allograft | 5 x 10 cm |
